

# SEENI SYED BASITH S

Machine Learning / AI Engineer — Fresher

 <https://github.com/seenibasith57-os> |  <https://www.linkedin.com/in/seeni05/> |  <https://seenibasith57-os.github.io/Portfolio/>

## PROFESSIONAL SUMMARY

Passionate AI/ML fresher with a B.E. in Computer Science and Engineering (AI & ML) and hands-on expertise in Python, machine learning algorithms, computer vision, data analysis, and model deployment. Demonstrated ability to build end-to-end ML healthcare systems, OpenCV-based computer vision applications, AI-powered analytics dashboards, and Retrieval-Augmented Generation (RAG) systems — from data preprocessing and model training through to deployment as interactive web applications.

## EDUCATION

### B.E. — Computer Science and Engineering (AI & ML)

Sethu Institute of Technology | CGPA: 8.384

### Viruthunagar Hindu Nadar Higher Secondary School, Madurai

12th Standard — 84.5% (2021 – 2022)

10th Standard — 90.6% (2019 – 2020)

## KEY PROJECTS

### CardioSense — Heart Health Risk Assessment System

Developed an ML-powered healthcare application that predicts heart health risk and generates a personalized Heart Health Score, with risk-level insights, interactive visualizations, and downloadable PDF health reports.

**Tech Stack:** Python, XGBoost, Random Forest, Scikit-learn, Pandas, NumPy, Streamlit, Plotly, ReportLab, Joblib

### Face Mask Detection System

Built a real-time computer vision classifier combining OpenCV face detection with a MobileNetV2 deep learning model to identify mask compliance from live video feed.

**Tech Stack:** TensorFlow, Keras, MobileNetV2, OpenCV, Caffe SSD

### AI-Driven Sales & Revenue Forecasting Analytics Dashboard

Built an end-to-end enterprise analytics dashboard with real-time KPI tracking, XGBoost-based revenue forecasting, automated executive insight generation, and a natural language Q&A engine that answers questions over the sales data.

**Tech Stack:** Python, Streamlit, XGBoost, Plotly, Pandas, NumPy, Scikit-learn

### Terminal RAG Chatbot

Developed a fully local, terminal-based Retrieval-Augmented Generation chatbot that answers questions from user-supplied PDFs using hybrid FAISS + BM25 retrieval merged via Reciprocal Rank Fusion, a Cross-Encoder reranker for precision, and FLAN-T5 for grounded answer generation with page-level citations.

**Tech Stack:** Python, FAISS, Sentence-Transformers, BM25 (rank\_bm25), Cross-Encoder, FLAN-T5

## TECHNICAL SKILLS

- **Languages & Data:** Python, SQL, Data Preprocessing, Feature Engineering
- **ML & Algorithms:** Supervised Learning, XGBoost, Random Forest, Logistic Regression, Linear Regression, KNN
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Plotly
- **Deep Learning & CV:** TensorFlow, Keras, OpenCV, MobileNetV2
- **Tools & Visualization:** Streamlit, Power BI, Excel, Git, VS Code, Jupyter Notebook, Kaggle

## CERTIFICATIONS & INTERNSHIP

- AI & Machine Learning Internship (2 Months) — Edu Tantr (Apr 2026 – Jun 2026)
- Power BI for Beginners — Simplilearn / SkillUp / Microsoft (Aug 2026, ID: 10622543)
- Data Analysis using Python — CodeChef (Jul 2026, ID: 1dee563)
- Python with Beginner DSA — CodeChef (Jul 2026, ID: d3b87bb)
- SQL Roadmap for Data Analysis — CodeChef (Jul 2026, ID: b681e47)
